### PROFILE

As a proficient frontend developer with years of experience in the web and mobile app development industry. I specialize in creating visually appealing and intuitive websites and mobile applications to deliver exceptional user experiences. I have a sharp eye for detail and am dedicated to turning your web vision into reality.

### SKILLS

#### Technical Skills

NextJS, ReactJS, Javascript, Redux, HTML, CSS, GIT, Tailwind CSS, React Native, SaSS, Firebase, Flutter

#### Industry Knowledge

UX/UI, Testing, Debugging, Usability Research, REST APIs & integrations

### PROFESSIONAL EXPERIENCE

#### Desense Co, Frontend Developer

- Built several websites for businesses, organizations, and startups
- Converted UI designs into fully functioning applications
- Developed cross-platform mobile apps for companies
- Deployed applications to live users
- Standardized all output with a new, responsive, mobile-first approach and strategy
- Integrated external REST APIs into applications

#### Openwaver, Frontend Developer

- Experienced in using modern Frontend Development technologies, including JavaScript, React.js, Redux, Tailwind CSS, HTML, and CSS.
- Skilled in integrating APIs into Frontend applications using Next.js.
- Adaptable collaborator with strong front-end focus and ability to learn back-end procedures
- Converted UI designs into fully functioning applications
- Deployed applications to live users

#### Opensource Contributions, Frontend Developer

- Actively contributed to open source projects, demonstrating proficiency in programming and a commitment to collaborative development.
- Designed and developed user interfaces for various projects, including LinkFree, WhisChat, and TweetSage, among others, with my work being thoroughly reviewed and merged.
- Demonstrated ability to create functional and visually appealing user interfaces for software applications.
